

# MOOG® Problem Solver® Hybrid Sway Bar Link Kits

**Designed for durability and easy installation.**

The MOOG® Problem Solver® hybrid sway bar link kits are a combination the MOOG Problem Solver bushing design and a new easier method of installation. The bushing design has been enhanced by using Thermoplastic Polyurethane (TPU) in place of traditional rubber. These TPU bushings center and hold the coated washers into place, making them easier to install.

Most MOOG Problem Solver hybrid sway bar link kits include a stop out at the end of the threads. With the nut seated fully against the stop the bushings are ideally preloaded to provide excellent durability. The washer and nut are designed to stop out directly on the connecting rod.

Along with these improvements, these sway bar link kits also feature other MOOG Problem Solver designs:

- Easy installation – washers are retained by bushings
- Stop out design minimizes sensitivity to installation torque. Just tighten fully! (Excludes K750221, K750748 & K80435)

# MOOG® Hybrid Sway Bar Link Kit Applications

PART #	APPLICATION
K7274	1998-2003 Durango RWD; 1997-2004 Dakota RWD
K7280	1995-1999 Ram 1500/2500/3500 4WD
K7299	1994-1995 Ram 1500/2500/3500 4WD
K7400	2002-2007 Ram 1500 RWD
K7422	2002-2005 Ram 1500 4WD
K7453	2000-2001 Ram 1500 4WD; 2000-2002 Ram 2500/3500 4WD
K750157	2008-2013 Ram 1500 RWD; 2011-2013 Ram 2500 RWD; 2011-2012 Ram 3500 RWD
K750221*	2004-2006 GTO
K750263	2005-2011 Dakota
K750581	2010-2012 Ram 2500/3500 4WD
K750748*	2013-2017 Focus
K80337	2005-2008 F150 RWD
K80338	2005-2008 F150 4WD
K80435*	1987-2004 Pathfinder
K80766	2006-2008 Ram 1500 4WD; 2006-2009 Ram 2500/3500 4WD
K80821	2006-2008 Ram 1500 RWD; 2003-2010 Ram 2500/3500 RWD
K80885	2003-2005 Ram 2500/3500 4WD
K80894	2006-2014 Ram 1500 4WD; 2015-2016 Ram 1500

\* Design does not stop out. Must be torqued to OE specification.
