

# INNOVATIVE ENGINEERING

- OE FIT, FORM AND FUNCTION
- ENGINEERED & TESTED IN NORTH AMERICA

- **Protective electrostatic paint** is utilized for enhanced corrosion protection
- **Precision welding** utilized as excess spot welds can lead to material fatigue and failure
- **OE design baffle** to prevent oil starvation & engine failure
- **Leak Tested** to ensure even the smallest cracks are not present
- **Peel & Salt Tested** to pass 200-hour salt spray test requirements
- **Fit tested** on the OE engine block
- **Road tested** to ensure real world performance and to verify that each design meets our high standards for quality
