

INNOVATIVE ENGINEERING

Innovative engineering, manufacturing technology and quality control ensure that Spectra Premium oil pans meet or exceed the performance of the original equipment they replace.

- Unit is designed to OE fit, form and function requirements accomplished by leveraging our OE expertise
- Durable powder coating applied to exterior of oil pan for a long lasting rust free unit
- Washed and then sealed with an anti-corrosive spray on the interior for a rust free unit at installation
- Fit tested on the very same vehicle application for which it was developed verifying first-hand that the design fits properly and can be easily installed
- Engineered to stringent tolerances based on our Canadian engineers' in-depth knowledge of the OE part it's designed to replace
- Road tested to ensure real world performance and to verify that each design meets our high standards for quality
- Coating salt spray tested for over 200 hours to ensure durability
