

DORMAN DOOR LOCK ACTUATORS

DON'T TRUST JUST ANYONE TO LOCK YOUR DOORS

Don't sacrifice safety with a cheap replacement door lock actuator (DLA). DLAs and newer integrated door lock actuator (IDLA) designs are critical components that should pass strict Federal Motor Vehicle Safety Standards and perform properly over the long term. Dorman delivers higher quality, more reliable solutions that are thoroughly tested and built for safety.

Reliability-Tested Up To 20,000 Cycles

FMVSS compliant – Unlike some aftermarket competitors, all Dorman integrated door lock actuators are designed to meet Federal Motor Vehicle Safety Standards to ensure reliability and safety.

Rigorously tested – All designs undergo tensile, salt spray, temperature and cycle testing in our state-of-the-art test lab in Colmar, Pennsylvania.

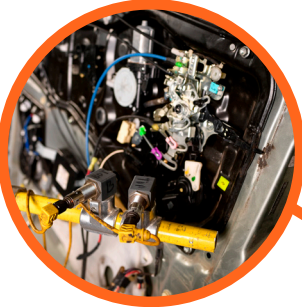

Durable materials – High-wear components are made from strong plastics and provide better lubrication, and integrated DLAs have corrosion-resistant electronics and connectors.

Limited lifetime warranty

DORMAN DOOR LOCK ACTUATORS

Temperature tested to ensure internal components last

Benchmark tested up to 20,000 cycles

Tensile tested to ensure strength of components

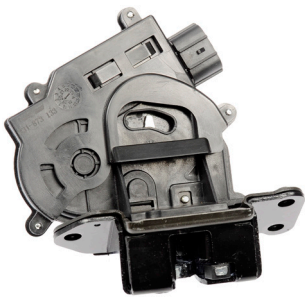

Competitor actuators have failed after just 700 test cycles – or roughly just six months of simulated use.

Dorman actuators undergo grueling tensile, salt spray, temperature and benchmark testing – equal to fifteen years of use.

SOLUTIONS FOR WIDE RANGE OF TECHNOLOGIES
