

# DORMAN EXHAUST MANIFOLDS

## CHECK OUT DORMAN FIRST FOR ALL YOUR EXHAUST REPAIRS

Why should you switch to Dorman instead of sticking with OE exhaust manifolds? Because our direct replacements are rigorously engineered, extensively tested, and include all the hardware needed for a first-time repair.

Whichever types of exhaust manifold you need—conventional, integrated, ceramic-coated—we're your one-stop shop for complete repair solutions that save time, money and comebacks.

## CHOOSE THE ORIGINAL AFTERMARKET INNOVATOR

**Rigorous engineering:** We test to surpass rigorous quality and emissions standards.

**Exact fit:** Our manifolds are reverse-engineered from OE for seamless installations.

**Complete solutions:** All necessary gaskets and hardware are in the box.

**Greener tech:** Our range includes CARB-compliant designs for states like California and New York.

## FEATURED EXHAUST SOLUTIONS

### Conventional exhaust manifolds

**Part shown: 674-869**, OE FIX exhaust manifold made with ductile iron (instead of gray iron) for greater flexibility and increased product life. Provides the installer with a better repair solution than the OEM. Includes a complete kit with a new manifold, manifold gasket, 1 flange gaskets, 3 studs and 3 nuts.

### Ceramic coated exhaust manifolds

**Part shown: 674-694XD**, ceramic manifold designed to have better heat distribution, increased performance and improved resistance to cracking, warping and corrosion.

### Integrated exhaust manifolds

**Part shown: 674-854**, integrated exhaust manifold that includes the manifold gasket, flange gasket, bolts, studs, nuts and washers. Other suppliers only include the manifold and flange gasket.
