

DORMAN VVT SOLUTIONS

FIRST IN THE VVT AFTERMARKET AND STILL INNOVATING.

Dorman is the market and technology leader in variable valve timing solutions. We offer the aftermarket's most comprehensive coverage for VVT products, including solenoids, camshaft phasers, magnetic actuators and oil control valves.

As VVT technology is increasingly integrated into more vehicles, Dorman continues to innovate with next-generation VVT products to meet critical demand as vehicles age.

Key advances in engineering— help to eliminate common failure points

Patented improvements over OE— including 8 patented and patent-pending solutions, and growing

Added value to shop owners and techs—Dorman was the first supplier to provide all the hardware, tools and gaskets for faster installation

Limited lifetime warranty—install quality Dorman VVT solutions with the confidence of a limited lifetime warranty on every part

DORMAN SOLENOIDS AND CAMSHAFT PHASERS

PATENTED ENHANCEMENTS AND PRECISION FIT FOR MORE VEHICLES.

VVT Solenoids

Dorman VVT solenoids deliver outstanding performance and long, trouble-free service life.

Engineered to exacting standards, many Dorman VVT solenoids are original designs and not simply re-boxed products like some of our competitors. Several parts include high-grade mounting hardware and gasketing for faster installation. Many are quality built with premium-grade copper windings and durable welded screens to fix failure-prone OE designs. All units are 100% tested for vehicle compatibility and performance and are covered by a limited lifetime warranty against defects.

Camshaft Phasers

Dorman camshaft phasers are engineered with hardened-machined steel and patented designs,

improving performance compared to OE and competitive units for greater reliability. Several Dorman camshaft phasers feature improved rotors and stronger alloy locking plates to reduce friction and wear and allow smoother operation. Some parts also include alignment and timing tools for faster, easier installation. All units are 100% tested for vehicle compatibility and performance and are covered by a limited lifetime warranty against defects.
