

SEALED POWER® VALVES

Featuring leading-edge design, premium materials and precision engineering, Sealed Power® valves are recognized for superior durability and fatigue resistance that can meet the demands of any application.

Statistically controlled production (SPC) processes guarantee strict dimensional tolerances, providing exceptional quality and optimal engine performance.

Sealed Power valves feature:

- Unsurpassed engineering, manufacturing and materials selection
- High fatigue strength
- Excellent heat resistance
- Wear-resistant Stellite® facings for late-model applications
- Chrome or plated stems for extra run-in protection
