

## Wiper Motor Bench Test for 40-190 and 40-191

**Application** GM vehicles using wiper motor 40-190 and 191.

**Problem** Determining if wiper motor is functioning.

**Cause** Follow the bench test procedure below to test motor.

Test set up: Power source must provide 12 volts DC, 15 amp minimum.

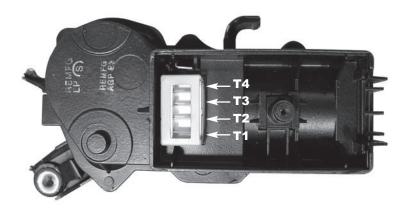

Battery ground must be connected to the motor housing for all tests. Disconnect motor from vehicle wiring for all tests.

Low Speed: Connect +12 volts to terminal T2. Motor runs in low speed.

High speed: Connect +12 volts to terminal T1. Motor runs in high speed.

Park: Connect +12 volts to terminal T4. Connect a jumper wire to

terminal T2 and T3. Motor runs, parks and stops.
