UNIVERSAL BODY GROUND STRAP KIT

*This kit does not replace the battery ground cable. A cable must be attached from the negative side of the battery to either the vehicle frame or the motor.

This kit will ensure all electrical components and lamps get proper grounds by allowing direct paths to ground and not relying on mounting hardware such as body mounts to supply grounding sources.

The strap contained in this kit will be used to properly ground the vehicle's body, core support, dash, tail panel, bed (truck applications), etc. to the frame.

- The self tapping screws have been provided with the kit for mounting purposes. These screws will require the use of an electric drill with a 3/8 socket or nut driver. If you do not have a socket adapter or a 3/8 nut driver, a 1/8 pilot hole can be drilled and the screws can be installed with a ratchet and a 3/8 socket.

Painless Performance Limited Warranty and Return Policy

Chassis harnesses and fuel injection harnesses are covered under a lifetime warranty. All other products manufactured and/or sold by Painless Performance are warranted to the original purchaser to be free from defects in material and workmanship under normal use. Painless Performance will repair or replace defective products without charge during the first 12 months from the purchase date. No products will be considered for warranty without a copy of the purchase receipt showing the sellers name, address and date of purchase. You must return the product to the dealer you purchased it from to initiate warranty procedures.
